### Catalogue Production

Bouchard Livestock International

### Insurance

An insurance agent will be available to assist you. We encourage you to take responsibility for protecting the value of your livestock in transit.

### Catalogue Information & Announcements

Information in this document is believed to be accurate but any updates at the sale by the owners, auctioneer or sales management will take precedence over the information provided in the sale catalogue. Pedigrees in this document have been supplied by the Breed Association and all other information has been supplied by the seller.

### Terms & Conditions

Cattle will sell under the standard Canadian Shorthorn Association Sale Terms & Condition, these are available on request.

### TH Status

All Fever sale lots are TH free. Since TH results were still pending at press time, any un-completed test results that come back positive, will be pulled from the sale.

### Embryo Package Terms

All embryo packages offered in The Fever Sale consist of a minimum of 3 embryos, with a guarantee of one pregnancy, if implanted by a certified technician. Embryos must be paid for in full prior to embryos being released.

Shipping arrangements and associated expenses are the responsibility of the buyer.

### Flush Terms

Flush lots require one-half payment due on sale day, with the balance due upon completion of the flush. Buyer pays all flush expenses & shipping expenses unless prior arrangements have been made with the seller.

### Transportation

The Fever Sale Group can assist you in arranging delivery of your purchases. For those of you who would like us to deliver your purchases, please contact the individual consignor. We will do everything we can to make it as convenient and economical as possible for the buyer.

Welcome to the 3rd annual Fever Shorthorn Female and Prospect Steer & Heifer Sale. It is our second year working with the Fever consignors, who have done a great job in raising the bar of quality in this year's sale. All the consignors as well as ourselves are committed to the Shorthorn breed as it picks up momentum as one of the hottest and most marketable breeds.

The sale has covered all angles of purchasing options; from opens, breds and donor cows to embryos, flushes and a pregnant recipient. The one thing that remains true through the whole catalogue is the quality of cattle backed by years of predictable genetics. There are many lots in the sale that have the full potential on winning many banners this fall and/or go on to be breed leading individuals.

Plan to be with us on October 22 in Olds, AB for one of the most exciting Shorthorn events of the year. If for any reason you are unable to attend and require further information please give the Fever Consignors or any one of us at Bouchard Livestock a call. Look forward to visiting with you at the 2009 Fever.

## LiveAuctions.TV

We invite those of you who are unable to attend to be part of the action! We would never want to give someone an excuse not to attend this event, but if the situation arises, we have you covered. With the help of LiveAuctions.tv, we are now able to give you a live connection to the auction. Real-time bidding will be available via the Internet for this sale. Live audio and live video will allow buyers to bid on animals as if they were present at the sale. Buyers must create an account at least 2 days prior to the sale.

Please visit <http://LiveAuctions.tv> to walk you through the set-up process.

Please contact Christine Boake (403) 850-6993 or Brad Fahrmeier (816) 392-9241 if you require any assistance.

**Bidder Verification:** The identity of all bidders will be verified by the auctioneer, sale management or owner. Bidding rights are provisional, and if complete verification is not possible LiveAuctions.tv will reject the registration and bidding activity will be terminated.

We will send you an email when each bidder signs up for your auction at this email address or a list of specified email addresses.

**Buyer's Premium:** There will be no buyer's premium for this auction

**Commissions:** There will be no commission for this auction.

**Disclosure:** LiveAuctions.tv is acting as agent and does not represent the Seller or Buyer.

**Disclaimer:** All information provided by LiveAuctions.tv LLC is believed to be correct but is not guaranteed. The information is being furnished to bidders for the bidder's convenience and it is the responsibility of the bidder to determine that information contained herein is accurate and complete. Any reliance on the content shall be solely at the recipient's risk. Each bidder must conduct and rely solely upon their own investigation and inspection.

BY REGISTERING AND BIDDING, BIDDERS AGREE TO THESE TERMS AND CONDITIONS

 PRAIRIE LANE ROAN DESIGN 2Z

When Ryan Dorran was here selecting for this sale, he urged me to consider consigning this female. Only because we have two maternal sisters, and some more calves coming in the next few months from her dam Sparkle, was this even considered. We are retaining her red Matrix heifer calf as well. Her first born, is now a herd sire at Lawler's Polled Shorthorns, Hansboro, ND.

One of the main reasons we purchased the Wolf Willow herd, was because this female and a maternal sister were included in the group. An additional bonus is that she is just entering her prime years of production. This female offers a lot to the breed - moderate frame, easy fleshing ability, outcross genetics, excellent udder, fertility and soundness. She is a maternal sister to our herd sire, Wolf Willow Major Leroy 1M X, who is the highest selling Short-horn sire that Semex has marketed. He is being marketed around the world by them, and we have received excellent reports of his calves from breeders in many countries. We have standing orders for embryos from her dam, and it could be the very same with this female.

We are confident enough in this female, and in her heritage, that we will offer to retain her in our herd for 1 year at NO COST to the new owner. We will pay ALL flush costs and split the embryos 50:50 with the buyer. Her natural 2010 calf will be maintained until weaning at NO COST to the buyer, and will be 100% owned by the buyer. We would also be willing to look at a longer term agreement if the buyer is interested. If the buyer is interested in this offer, we will waive our retention of 1 complete flush in her.

The search for new outcross genetics has never been greater in the history of the breed. By offering this female, we feel we are assisting you in this search. This female is unique in phenotype and genotype. This is a rare investment opportunity, and we hope all serious breeders of Shorthorn cattle will take a few moments to study the opportunity this female offers. Tested TH and PHA free.

**Retaining the right to one flush (minimum of 6 grade 1 embryos)**

**Bred June 14,, 2009 to Star P Matrix 4N XM470413. Ultrasounded safe with a heifer calf.**

 JAY-CIE DR ELSIE 4D X-F66

It was only after considerable thought, and our desire to offer a special lot in the Fever sale, have we decided to offer 3P in this sale. She was purchased as a foundation female here at Fantasy Lane, when she was sold in the 2004 Canadian Western Agribition sale, as the high selling female at \$8000. Earlier that day she had been named the 2004 Reserve National Champion female. She has developed into an awesome female in her own right, and she has proven her breeding ability through her offspring. Her first calf Fantasy Lane Jaded Lady 6S, was the high selling female in the 2006 Royal sale, at \$5000, to Ted Hossfeld, Walkerton, ON. We have an excellent Prime Minister daughter that we are retaining. We also have embryos in inventory that we will use to continue this line in our herd.

We own her dam, Elsie's Jade, with Horseshoe Creek, and she has been one of our most popular donors. We have a waiting list for embryos from her. We have flushed 3P, and have embryos from her to carry on her legacy in our herd. Embryos from Elsie's Jade 3P have sold to leading breeders in Canada, USA and Scotland. Embryos from her dam, New Beginnings Elsie's Jade have sold to 6 countries.

We also have two full sisters and two other daughters of her dam, New Beginnings Elsie's Jade. We also have some granddaughters as well, which makes this decision to sell 3P a little easier to do.

She is sired by Byland Gold Spear X who has sired some excellent producing females throughout Canada and the US. The flush which resulted in 3P being born, also resulted in 4 full brothers, all of which were sold as herd sires in purebred herds, where they produced some excellent offspring.

Females like this are seldom offered for sale. Here is a rare opportunity to add foundation genetics from a proven female and from a proven popular cow family. She is just entering her prime production years. That sound you are hearing is opportunity knocking!

Selling 100% interest and possession. We retain the right to one flush (Minimum 6 grade 1 embryos) from 3P at a time that is convenient to the buyer.

**She sells open and ready to be flushed.**

**Consigned by: Fantasy Lane Shorthorns**

This female would normally not be offered, however, we have decided to reduce our herd numbers as a result of losing some pasture. 24U is a moderate framed female, like all of our Mist's Return's are, and she is sound made and feminine. She was the first calf from a very good heifer we purchased from Gary and Linda Rose. She comes from the Madonna cow line that is one of the very best in their herd. She is as maternal as we know how to make them and she will work anywhere. She is carrying the service of our TPS Coronet Leader 21st son that sold for \$5800 for 2/3 interest in the '08 Agribition sale to Galbreath Farms, Enderlin, ND. Tested TH and PHA Free

A solid made heifer that comes from a Leroy daughter, who won her class at Agribition in 2005. These bred heifers were developed through the winter on alfalfa hay ( with no additional grain supplement) and grass until September, and I think this may be the best set of bred heifers we have ever had. Her pedigree is stacked with easy fleshing outcross genetics for generations, which should ensure her breeding ability. Tested TH and PHA free.

This is one of the best Northern Legend 3N heifers ever born here. Her dam is producing right at the top of the herd. 18W's full brother is a herd bull at Kotric stock farms. Her maternal sister, Diamond Uppity Baroness topped the heifer calves in last year's Treasure Chest sale to Sadie Anwender and then won her class at Agribition, she went on to do some winning as Sadie's 4H project this year. 18W is also a maternal sister to our new senior herd sire Diamond Temperature Rising 28T. This calf is eye appealing, thick and correct with a great coat of hair. Watch for her, she has a family tradition she is sure to maintain.

It took a little convincing but Maggie is selling in the FEVER! 4W is the result of a flush we purchased in the 06 Shadybrook production sale along with our friends at Hill Haven, who have an outstanding full brother to this heifer. Two years later we teamed up Shorthorn Enthusiast Bob Riviere to purchase Maggie 024 at the top of the 08 Shadybrook Sale. Maggie 024 is a model Shorthorn female. She possesses a perfect udder combined with flawless structure, and a ton of eye appeal. Maggie 024 also stems from the Shannon Margie cow family that produced Sullivan's 2009 Denver Champion Female! Maggie 4W is a paternal sister to last year's high seller who has been successfully campaigned by Jordan Buba and Andy Hadway, and will be a major contender this fall. Don't miss this opportunity to acquire one of the hottest females to sell at the FEVER!

Grissom 24T has been used heavily on heifers and cows here at Crooked Post for the past two years. He maintains body condition in harsh working conditions, his progeny possess growth, muscle and sound structure, Grissom is homozygous polled which is a plus in marketing bulls, he is docile and he projects the maternal power of the Red Rose family. He is currently in collection as we will be offering semen packages on him in the future and are in the process of filling an order for a repeat customer in Uruguay. Crooked Post Hope 5W will, with high certainty, carry on the tradition of predictable performance. SEE [www.crookedpost.ca](http://www.crookedpost.ca) FOR MORE DETAILS.

Another Fever sale and another Godiva is coming to town! Godiva 7W is out of a beautiful two year old Pure Gold Daughter, who was named Champion Female at Lloydminster last fall. Godiva 14T is also a maternal sister to our High selling, lead off heifer from last year's sale, and a full sibling to our embryo lot in this sale! Her sire, Code Red, was the \$20,000 Agribition high seller, who returned the following year to be named reserve National Champion. This cow family is continuing to produce high end females, and here's your chance to get your hands on one!

Red Rose 15W is a near perfect duplicate of her full sister, Red Rose 4U, who is at the lead of our replacement bred heifer group this Fall and who placed at the top of her group this past spring for %IMF and Lean Meat Yield. With the various methods we utilize to measure the performance and predictability of our cattle the Red Rose family continues to contribute and play a bigger role in our herd every year. Red Rose 15W is no surprise to us, she is easy fleshing, moderately scaled with faultless structure, full of red meat, and as feminine as they come. Cumberland 14W comes from the legendary WHR Cumberland cow family that produced the great Sonny bull, a US National Champion Female, and a US Jr National Champion. Her maternal grand dam was successfully campaigned by us, and was Yearling Champion at Farm Fair in 2004. Her dam is one of the reasons why we are loving the Pure Gold Daughters we have in production. Cumberland 14W is also the first heifer to sell off of the \$20,000 Timeline bull, who combines the proven track record of Salute, and the maternal powerhouse Shadybrook Presto, who steams from the legendary Picture Perfect cow Family.

Entered at Agribition.

18W is an ET heifer that comes from one of our most consistent cow families, the Secret Maids. Her grand dam, HC Secret Maid 18F \* was the donor that started our ET program, and she had passed \$150,000 in sales of offspring and embryos when she died two years ago. 9N was selected to carry on the family tradition and she produced two of the best females we have produced, in her first year of production. Take a look at the females, in the pedigree of this heifer. She is backed by generations of great producing females, which insures a bright future for her. She possessed the easy fleshing traits that Leroy puts in his offspring. Here is a female that can work in any program, and with a wide variety of sires. We offer her with the confidence that she will continue to develop into a great breeding piece. Tested TH and PHA free

35W is a young heifer from one of our very best producing two year old females. Her dam is an ET full sib to HC Timeline 17T x\* who topped the '08 Sun Country Bull Sale at \$20,000. She comes from one of the legendary cow families in the breed, the Picture Perfects. Her grand dam has been one of our most popular donor females, Shadybrook Presto 73G x\*, who is now 12 years old and still looks like a 5 year old female. Her sire, Mist's Return, has been used on our heifers for four years now, and he is the easiest calving sire we have ever used. In three calf crops we have only assisted one heifer that had a malpresentation at calving time. This heifer is a last minute addition to our sale entries, so she will be a little greener, however, she is backed by some of the best maternal lines we have ever owned.

Lucy was our pick of the bred females in the 2006 Shadybrook sale, and she has produced 3 excellent calves since arriving here. Her first, a bull, sold for \$3300 and is working in the Misty Hills herd, at Dawson Creek, BC. Her second calf was another bull, and he sold for \$4500 to Little B Cattle Co., Alameda, SK. This year's calf is a Major Leroy heifer that will be in our show herd this fall, and she will be a replacement female in our herd.

Lucy is a true beef cow, with tremendous depth and capacity, an excellent udder, and is trouble free and sound in every way. We have flushed her once, and she produced 17 grade 1 embryos, and they were all sold to International buyers. She is due to calve in early March, 2010, and she should be ready to flush in late April - early May. If the buyer is interested, we would share equally in two flushes, so that two different sires can be used. We will supply semen from any of the sires we have in our inventory, free for this flush, if the buyer wishes to use them.

We wanted to offer a very unique flush in the Fever sale this year, and Lucy was the first female that came to mind. We think this is a great opportunity to add some powerful genetics to your herd.

**Flush to be conducted after she calves in 2010. Minimum of 6 grade 1 embryos are guaranteed.**

Here is the cow Family that started it all for Fantasy Lane farms, a daughter of this dam was the first Shorthorn I Purchased. Poplar Lane Fantasy 7N this girl got me hooked on Shorthorns. She has gone on to be an excellent producer for us here, her first calf a Gold Spear Daughter was a National Champion in Edmonton, her next calf was a bull sold to Poplar Lane Fantasy Lane High Voltage. Her next calf was another bull retained by ourselves by Huberdale Master Charge, Fantasy Lane Master Charge he was a class winner at the Royal Winter Fair in Toronto. This year she has a great late May heifer by Rockdell Pride 50K, she just doesn't miss. Her daughter Fantasy Lane Figment, has proven herself as a great producing female as well, her first calf Fantasy Lane So Hot was Grand Champion Bull at the Royal Winter Fair as a calf. So when the opportunity came up to purchase Pierrette we jumped at it and immediately put her in our flush program. She has been a great producer of embryos most flushes have been 10 or over, her last flush was 11. Don't miss Your opportunity to make your own Fantasy a reality! **Minimum of 6 grade 1 embryos are guaranteed.**

**MILLVALE MIKE'S CUJO 279A X**  
**LF NIAM 293 X**

Pioneer was one of the most structurally sound sires we have ever owned. His premature death was one of the worst losses we have experienced. We could not be more pleased with our Pioneer calves, and we think he is one of the most consistent sires we have ever used. He is homozygous polled, so the resulting calves will also be polled. Pioneer was the 2006 Canadian National Champion Bull. He possessed large testicles, big sound feet, tremendous natural muscling, and a great disposition. HC Melba Niam 67J has been a stellar donor and she has offspring in 5 countries now. She has been one of our most consistent embryo producers. She has tremendous capacity and is extremely smooth and fertile. The resulting calves will be registered as purebred in the closed herd book in Canada. This is a mating of two excellent beef animals, and the calves resulting should be excellent. **Guarantee 2 pregnancies at 60 days, providing an embryo technician is used & normal accepted management is provided. These embryos are exportable.**

This embryo offering combines the genetics of two of the easiest fleshing, thickest made, soundest structured Shorthorns we have ever owned. Major Leroy is moderate framed and easy fleshing, yet he and his progeny are getting rave reviews from around the world. He is the highest selling Shorthorn sire that Semex has marketed. He sires excellent offspring of both sexes. Our Leroy bulls have had excellent ultrasound data, and his daughters are easy fleshing cows that raise excellent calves. Six S Leah 55L has become one of our most popular donors. She is a tank, and is proof that big cows can also be easy fleshing cows. She is our most prolific embryo producer... ever. In six flushes in 2008, she averaged 26 grade 1 embryos per flush. More importantly, she settled to an AI breeding a few days after her last flush. She has passed on her massive capacity, thickness and fleshing ability to all her offspring. Her 2008 son, HC FL Patriot 71U x\* was our top selling bull in the 2009 Sun Country Bull Sale at \$5000 to Raymond Carnes, Tyler, TX. **Guarantee 2 pregnancies at 60 days, providing an embryo technician is used & normal accepted management is provided. These embryos are exportable.**

Lady Sofia was Purchased by Fantasy Lane Farms the first Fever Sale, we couldn't be more pleased with her and her offspring. So we would like to give other breeders the opportunity to add these genetics to their herd. Rockdell Pride 50 K needs no introduction I think just about everyone has seen daughters of his that they would like to add to their herd. So here is your chance to put your prefix on a Rockdell Pride out of a great Gold Spear Daughter. **Guarantee 1 pregnancy at 60 days, providing an embryo technician is used & normal accepted management is provided.**

# Pregnant Recipient

**B Good Red Sue 1P**  
Dam

**Pheasant Creek Leader 4th**  
Sire

**38 LEADER 4TH X RED SUE 1P**

Male Pregnancy due February 25, 2010

**Kinnaber Leader 6th**  
**Sire: Pheasant Creek Leader 4th**  
**Hi Way Honeysuckle**

**CCS Equity's Charmer ET**  
**Dam: B Good Red Sue 1P**  
**CF Roan Sue 644 TP X**

We thought it would be most fitting if one of the very last offspring that will ever be born from Pheasant Creek Leader 4th to be offered in Olds, AB, where he was sold in the Remitall Shorthorn dispersal in 1973. Leader 4th was the Grand Champion and record selling bull at the 1970 Regina Bull Sale selling to Remitall Cattle Co, Olds, AB. He was, in my opinion the best bull ever born from the Leader line and if he was alive today, he would be an extremely popular sire. He was homozygous polled, tremendously thick made, easy fleshing, possessed incredible smoothness, and had a rich red color. He had a huge rear quarter and was extremely easy calving. The dam of Leader 4th, Hi Way Honeysuckle X was one of the greatest Shorthorn females I have ever seen in my lifetime. She would be considered a great female in any era. I purchased B Good Red Sue 1P ET\* at the top of the 2008 Cagwin Farms Labour Day sale, Virginia, ILL with this flush in mind. I had been looking for a special female to flush with the last semen remaining from Leader 4th, and when I saw her, I thought she would be a perfect match. The dam of Red Sue, CF Roan Sue 644TP X, is considered by many as a model female in the breed today. Red Sue possesses many of her outstanding traits. The bull calf resulting from this pregnancy will be solid red in color, polled, and he could be one of the most unique sires in genotype and phenotype in the present era. His pedigree will contain many of the outstanding sires and dams from 40 years ago along with some of the best from the present. We think this is an opportunity that any serious Shorthorn breeder will want to consider. It just doesn't get much better than this! This is serious herd bull time! **Selling 2/3 interest and full possession. Horseshoe Creek retains a 1/3 full semen share in the resulting bull calf. We will pay 1/3 of all semen collection and semen promotional costs and share in 1/3 of the revenue from semen sales.**  
**Consigned by: Horseshoe Creek Farms Ltd.**

# Prospect Steers & Heifers

New to The Fever Shorthorn Female sale is an elite set of Prospect Steers & Heifers. They have been selected from the very top end of the represented herds. The steers are different ages and different weights to accomodate all 4-H members different times of year for their achievement day. They are stout, big hipped, sound, with tonnes of hair. The females posses extra eye appeal but still are made in a stout package and will make strong cows after there show career.

Listed below are the early selections and there will be more Steers and Heifers selected before sale day. If you are interested in consigning please contact Bouchard Livestock International.
