Welcome to the 2015 edition of the Genetics To Make A Difference Semen and Embryo catalogue. For 2015 we are able to offer a very proven set of AI sires to an industry that is finally enjoying some very exciting times. The beef industry, and the purebred Simmental business in particular, participated in a very positive fall in 2014. Those early-born calves were returning $1,800 to $2,000 per head. The ranchers that have streamlined their calving for grass were receiving $1,500 to $1,600 returns. Slaughter cattle in early 2015 were seeing $3,000 prices for slaughter bulls and cull cows were returning proceeds up to $2,000 per head. The excitement in the beef industry has not been this positive for a long, long time.

The specific bulls in the Genetics To Make A Difference offering are made up of performance-packed red and black bulls like Crosby, Red Power, Full Throttle, Casino, Authority and Black Advance. In the blaze faced section we have added the Blaze bull who has done a great job in limited herds. He will be a compliment to the blaze faced bulls like Broker and Currency. The black and red calving ease section will be highlighted by Mr CCF Vision, who has been calved in a number of programs in 2015. Our calving ease line up is very solid with Vision, Red Earth, Otis, High Voltage, Red Force, Odin and Black Edition. The calving reports on Discovery are very exciting, he is a sure-fire calver on cows, with 80 to 95lb birth weights, loads of hair and calf vigor. He is destined to be the sire of some great replacement females. The Profit bull, owned by Hartman and partners, will be sold in limited semen units and will create a stir when those first calves hit the ground. The Fullblood Full Fleck section has been ramped up with the addition of Jungle, Woonallee Hadau and Zhek. They compliment the proven offering of bulls such as Imax, Radium and Total Value that are doing a tremendous job in their recommended areas. The embryo section continues to create huge interest with a great set of proven donors flushed to the top sires in the breed. We welcome your call if you are interested in a flush or specific genetic matings.

Bouchard Livestock brings 45 years of involvement in the Simmental industry both seedstock and commercially. The selection for the Genetics To Make A Difference program spans over the last twenty years and our interaction with seedstock producers and commercial producers has been both rewarding and educational. We have evolved with our customers and we are committed to provide you genetics that are not based on a fad or popularity contest. As the front of our catalogue displays - beef bulls for beef producers!

I want to wish each and every one of you a great spring and summer breeding season. May the fall of 2015 meet all of your marketing expectations, be it purebred or commercial. Please call me or any of our qualified staff or our top-notch set of distributors to assist with your sire and embryo selection to produce the most marketable progeny in the history of your respective operation.

-Brian Bouchard
